Notes: This drawing is based on a computer generated Zone of Theoretical Visibility (ZTV). The areas shown indicate the theoretical theoretical visibility of the proposed turbines using GIS based on 10 data only and do not take account of any screening from vegetation or built form. The ZTV also includes an assessment for effects for the Corridor and Light Pollution of the Earth.

This figure has been based on the following parameters:
 Turbine height: 100m
 Hub height: 100m
 Rotor diameter: 100m
 Height to blade tip: 200m

Scale: 1:100,000
